School / Education

FUNDING AGENCIES	Regione Emilia Romagna
STARTING DATE	Janaury 2013
IMPLEMENTATION PERIOD	11 Months
DESCRIPTION	The project aims to sustain both Syrian refugees, escaping from civil war and arrived in the Beqaa valley and the hosting population. Main activities concern wash facilities and diesel oil supply, the latter essential for the activity of the water supply system.
OBJECTIVES	The main aim is to intervene in state of emergency: a special attention is focused on the quick identification and assistance of new refugees arrived in the mentioned areas, through a supply of wash facilities for water conservation, storage and treatment for domestic use.
ACTIVITIES	Wash facilities supply for water conservation, storage and treatment for domestic use. Supporting the Lebanese hosting community in a concrete way, with a distribution of vouchers, designed for the purchase of diesel oil. The latter is essential for the activity of agricultural wells, that are used for water supply.
