METHOD  
Prevention

LOCAL PARTNERS	Provincial Bureau of Health
INTERNATIONAL PARTNERS	UNICEF
FUNDING AGENCIES	UNICEF
STARTING DATE	October 2010
IMPLEMENTATION PERIOD	12 months
DESCRIPTION	The project was aimed to the Community Health Agents (ASC), to the health care workers and the community leaders to strengthen their expertise in the field of prevention and malnutrition. Thanks to the reinforcement of sanitary structures and training activities we could assist children under the age of 5, pregnant or breast-feeding women.
OBJECTIVES	Ensure adequate treatment to malnourished children through improvement of local organizational abilities and community awareness about malnutrition prevention.
ACTIVITIES	<ul style="list-style-type: none"> <li>• Reinforcement of cures and support against malnutrition according to the national Protocol.</li> <li>• Production and diffusion of formal implementation modules for the national Protocol.</li> <li>• Supply of nutritional therapy equipment and products.</li> <li>• Development and implementation of a strategy to promote healthy eating and nutritional habits.</li> </ul>
