| STARTING DATE | July 2013 |
| OBJECTIVES | The program aims to strengthen the strategies in lessening the impact and risks of natural disasters. In fact, the climatic change events threatens the vulnerable communities of Oruro and Cochabamba departments by consuming their sustenance. Specifically, the prompt answers to these conditions are adopted in cooperation with the institutions and producers of these areas, by enhancing their capabilities to face them. |
| ACTIVITIES | <ul style="list-style-type: none"> • Monitoring the consequences of floods, icing and drought on sustenance in the areas of Toledo and Huayllamarca (Oruro department) for planning effective measures of protection for local cultivations. • Building of small facilities for the protection of cultivations in vulnerable areas with the support of innovative features and traditional techniques. • Training materials and assistance in preventing natural disasters. |
