LOCAL PARTNERS	Municipality of Hebron
FUNDING AGENCIES	TIPH - Temporary International Presence in Hebron
STARTING DATE	July 2012
IMPLEMENTATION PERIOD	5 months
DESCRIPTION	The project allowed the rehabilitation of 2 reservoirs in the H2 area in Hebron old city, that lead to a wider water availability benefiting all population. The reservoirs were connected to the existing pipeline, while water was provided by the Hebron municipality. The reservoirs provide water to the population of the area comprised between Bab-al-Baladiyye and Bab al-Khan.
OBJECTIVES	The project mitigated the precarious situation of water scarcity, giving to the population a more regular access to water, especially during summers.
ACTIVITIES	<ul style="list-style-type: none"> • Rehabilitation (clearing and covering of the reservoirs); • Mechanical reparations (provision and installation of pipeline and connectors, provision and installation of pumps); • Electrical works (pump's connections, design and installation of a control panel).
